Installation kit

Included with battery purchases & can be purchased separately

Every SCM Systems Lithium-Ion battery & charger pack is supplied with a purposely designed installation kit. The kit includes all the parts required to ensure a stable and vibration free installation.

The battery and the charger are rubber mounted and the battery is held in place by a secure and vibration insulated strap.

The wooden box, in which the battery is supplied, provides sufficient plywood for the installer/owner to easily make a bases for the battery. Refer to the website for detailed installation instructions.
